

# Getting involved

## Who are SPRUN?

The Scottish Paediatric Renal Urology Network (SPRUN) is a group of professionals in Scotland who are involved in the care of children and young adults with kidney and bladder health care issues.

## How can I get involved?

SPRUN are looking for patients and their families to get involved. Examples of getting involved include:

- Giving feedback on individual pieces of work SPRUN does such as patient information, guidelines or our website
- Pointing out areas that are important to you. This helps us to prioritise.
- Taking part in planning meetings and events
- Telling us about your experiences

Your level of involvement is entirely up to you. Involvement can range from electronic feedback to attendance at SPRUN meetings. Whatever you feel comfortable with.

Our initial aim is to pull together a virtual group. Emails would then be sent to this group for comment with responses collated anonymously.

If you would like to get involved then please visit the SPRUN website – [www.SPRUN.scot.nhs.uk](http://www.SPRUN.scot.nhs.uk) or contact us by email at [nss.SPRUN@nhs.net](mailto:nss.SPRUN@nhs.net)

## Questions?

Any questions can be addressed to either the SPRUN team or to your local Renal and Urology team.

**Your opinion matters.  
Please help us to continue to develop our  
services!**
